DETAILED ACTION

1. Preliminary amendment filed 20 November 2000 (Paper No. 2) has been entered.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 10-15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims recite or encompass the term "degenerate variant" and "hybridize" whose metes and bounds are not clear because it is not clear what is the limits of the structure and no functional limitation is provided.

Claim 10-15 recite or encompass the term "hybridizes" whose metes and bounds are not clear because it is relative term without specific hybridization and wash conditions. Furthermore, DNA which hybridizes encompasses variants.

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Art Unit: 1646

3. Claims 10-15 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Written description rejection.

Claims 10-15 encompass variants without structural limitation because of the term "variants" and hybridize". However, the specification only discloses working example of a specific species of TRIP. *University of California v. Eli Lilly and Co.* (CAFC) 43 USPQ2d 1398 held that a generic claim to human or mammalian when only the rat protein sequence was disclosed did not have written description in the specification. Thus, the disclosure does not have written description for the genus of variants of TRIP. One skilled in the art cannot envision the sequence of the other variants of the TRIP. Furthermore, the variants are not limited by functional claim limitation.

4. No claims are allowed.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael Pak, whose telephone number is (703) 305-7038. The examiner can normally be reached on Monday through Friday from 8:30 AM to 2:00 PM.
